# Treasure Island

When does a swarm of LLM agents whistleblow, and what in their environment changes that?

## 1 Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat (Perez et al., 2022). Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur.

Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum. Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo.

## 2 Related Work

Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt (Park et al., 2023). Neque porro quisquam est, qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit, sed quia non numquam eius modi tempora incidunt ut labore et dolore magnam aliquam quaerat voluptatem.

## 3 Methods

### 3.1 The game

Ut enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur. Quis autem vel eum iure reprehenderit qui in ea voluptate velit esse quam nihil molestiae consequatur, vel illum qui dolorem eum fugiat quo voluptas nulla pariatur.

### 3.2 The agents

At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti quos dolores et quas molestias excepturi sint occaecati cupiditate non provident, similique sunt in culpa qui officia deserunt mollitia animi, id est laborum et dolorum fuga.

### 3.3 Measuring whistleblowing

Et harum quidem rerum facilis est et expedita distinctio. Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus.

## 4 Results

Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae. Each subsection below reports one experiment, and each rests on games committed to this repository that replay with no keys.

### 4.1 Where the treasure lands decides the silent crew's score

In 1 of the 2 sample games (50%) the crew dug up the treasure, and it scored 115 on average.

Itaque earum rerum hic tenetur a sapiente delectus, ut aut reiciendis voluptatibus maiores alias consequatur aut perferendis doloribus asperiores repellat. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

**Figure 2:** A silent crew searching the grid alone, replayed from the committed run `runs/silent-seed-7`. Rebuild it with `make figure NAME=silent-game`; play the game again with `uv run treasure-island run configs/silent.toml --seed 7`.

Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. The games behind this section are in `results/sample-sweep-seeds/`, and `uv run treasure-island replay results/sample-sweep-seeds/small-crew-seed-1` plays one back.

## 5 Discussion and Limitations

Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

### 5.1 Future Work

Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam.

## 6 Conclusion

Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt.

## A LLM Usage Statement

Lorem ipsum dolor sit amet, consectetur adipiscing elit. The authors chose the questions, designed the game and the experiments and directed the work; a team of Claude agents built the sandbox, its tests and the figures through a pull-request workflow, and OpenAI Codex reviewed each change. The authors take responsibility for every claim in the paper.

## B Code and Data

Code, configs, run logs and archived model replies, MIT licensed: https://github.com/al-beton/apart-swarm-alignment. Every committed game replays offline with no API keys, and every figure rebuilds from those games.

## C Limitations and Dual-Use / Ethical Considerations

### C.1 Limitations

Ut enim ad minima veniam, quis nostrum exercitationem ullam corporis suscipit laboriosam, nisi ut aliquid ex ea commodi consequatur.

### C.2 Dual-use risks

Quis autem vel eum iure reprehenderit qui in ea voluptate velit esse quam nihil molestiae consequatur.

### C.3 Ethical considerations

At vero eos et accusamus et iusto odio dignissimos ducimus qui blanditiis praesentium voluptatum deleniti atque corrupti.

## D Reproducibility

Every game the paper reports is committed under `results/` and replays with `uv run treasure-island replay <folder>`, with no keys and no network. Every figure is named in `src/treasure_island/figures.py` and rebuilds with `make figure NAME=<name>`.
